About DENEVY

DENEVY has been founded in 2014 and during the first 2 years become a part of major software integration projects that helped build a strong awareness of our company. Today, DENEVY is growing and profitable IT company without any external investments providing Software development, Software integration and Testing, DevOps, RPA, Cloud and Security solutions. Our portfolio of customers consists of leading companies in the field of Telco, Insurance, Banking, eHealth or Automotive. We have also created own solutions awarded the IT Product of the year.
The company has professionals with many years of experience who are forged in their field and can flexibly cover a number of areas within ICT. The advantages of DENEVY are a pro-customer approach and intuition with regard to customer needs, goal orientation, the ability to analyze the issue in detail, design an optimal tailor-made solution, implementation and subsequent support after the final handover.

We use the most modern technology, adapt to new developments and respond flexibly to changes in the field of ICT to meet the needs of our customers.
